

SANJAY M

B.TECH INFORMATION TECHNOLOGY STUDENT

Tamil Nadu, India | +91 9585824595 | sanjaymp2107@gmail.com

Portfolio: portfolio-sanjaym.vercel.app | GitHub: github.com/Sanjaymp21 | LinkedIn: linkedin.com/in/sanjay-m-39b99a385

PROFILE

Second-year B.Tech Information Technology student with hands-on experience in full-stack web development, artificial intelligence, machine learning, and data-driven applications. Proficient in developing responsive web interfaces and building technology solutions through academic projects, hackathons, and technical initiatives. Strong interest in applying software engineering and emerging technologies to solve real-world problems.

EDUCATION

Bannari Amman Institute of Technology, Tamil Nadu

2025 – 2029

B.Tech – Information Technology | First-Year CGPA: 8.05 / 10

Higher Secondary Schooling (12th Grade) | Secondary School (10th Grade)

90% | 96%

TECHNICAL SKILLS

Programming Languages: Python, C, Java, JavaScript, TypeScript

Web Development: HTML5, CSS3, React.js, Next.js, Tailwind CSS

Backend: Node.js, Express.js, REST API Development

Databases: MySQL, MongoDB, PostgreSQL

AI & Data: Machine Learning, Big Data Analytics, Data Analysis

SELECTED PROJECTS

SST Groomers – Pet Grooming Trust & Booking Platform

React.js | JavaScript | Tailwind CSS

- Developed a responsive platform for online appointment booking, service discovery, and customer trust, with reusable UI components.
- Implemented service packages, reviews, trust indicators, and customer-oriented workflows.
- Developed as part of Software Innovation Challenge 2026.

EndoJourney AI – AI-Powered Journey & Recommendation Platform

AI | Machine Learning | Web Development

- Developed an AI-driven platform providing personalized journey planning and intelligent recommendations.
- Applied AI concepts to analyze user preferences and designed a user-friendly, personalization-focused interface.
- Explored the integration of AI capabilities into a practical real-world application.

EcoSense AI – Smart Environmental Monitoring System

Python | Machine Learning | IoT

- Designed an AI-driven environmental monitoring solution using sensor-based data and ML concepts.
- Focused on developing a technology-driven solution for sustainability-related challenges.
- Developed as part of a hackathon-based innovation project.

PCDP v4 – Secure Digital Attendance System

Web Technologies | JavaScript | Database

- Designed a digital attendance management solution to streamline attendance tracking.
- Focused on secure data handling and efficient digital workflows.
- Developed a user-friendly interface for managing attendance-related information.

HACKATHONS & INNOVATION

- Contributed to real-world software solutions through ideation, prototyping, development, and presentation.
- Collaborated with teams to transform problem statements into functional technology concepts across AI, sustainability, and software challenges.
- Gained practical experience in rapid problem-solving, solution design, and technical presentations.

LEADERSHIP & TECHNICAL ACTIVITIES

Student Team Leader – Big Data Analytics & Machine Learning

- Coordinate a technical learning team focused on Big Data Analytics and Machine Learning.
- Organize structured learning sessions, technical events, and project-based activities.
- Support members in developing technical skills through hands-on learning and hackathons.

CERTIFICATIONS & LEARNING

Cisco – Python Programming | Full-Stack Web Development | Big Data Analytics | Machine Learning

AREAS OF INTEREST & CORE COMPETENCIES

Interests: Artificial Intelligence • Machine Learning • Big Data Analytics • Full-Stack Development • Cloud Computing • Software Engineering

Competencies: Problem Solving • Software Development • Team Collaboration • Leadership • Technical Communication • Rapid Learning
